PRODUCT GUIDE

**Mathys® has long been offering a complete range of professional interior paints, adapted to every type of application or substrate. Interior wall paints that meet all requirements regarding degrees of gloss, opacity, colour and ease of application.**

## The perfect finish for beautiful results

Whether you're after a contemporary, stylishly classical or sleek modern interior, Mathys® always has the right products available. Professional products that ensure a perfect finish for all interior walls and ceilings. The combination of good substrate preparation and the right finish always ensures the best results!

***This brochure gives you an overview of the most common paint systems by Mathys® that ensure you can finish any room to perfection.***

**GOOD preparation** + **RIGHT finish** = **TOP result**

# Mathys® works for better health and a better environment !

## Environment & Health

By choosing Corporate Social Responsibility, you choose a harmonious combination of the 3 P's: People, Planet and Profit. This helps business activities to contribute to a sustainable society.
This also involves choosing products and services with the lowest possible negative impact on people, the environment and society, in short **approved by nature**.
This is an attitude that goes further than just following the rules and laws. It often results in an organization that is more innovative and efficient, with a pleasant work culture where there is room for respect and dialogue. Such a company or organization can be proud of a positive image, and is respected and trusted by many.

***Striving for the best solution for our customers***

Under European Directive 2004/42/EC and the resulting national legislation, the maximum proportion of VOCs in grams per litre of ready-to-use paints and varnishes is strictly limited. Aside from a few well-defined exceptions for certain sectors and applications, it has not been permitted to use or sell paints that exceed these established maximum values since the 1st of January 2010. This involves paints and varnishes for the interiors and exteriors of buildings that are applied by professional painters as well as by private individuals. Although paint manufacturers have done their best to modify their products, and the levels of VOCs in paints and varnishes have been reduced dramatically, their impact on people and the environment remains considerable. They are only safe for people and the environment with the correct painting technique and high quality paint that contains little or no solvents.

** VOC are volatile substances. These are hydrocarbon compounds that can easily evaporate. This can result in air pollution and acidification.*

Environment & nature friendly paints from Mathys®

*The Paracem® Deco Nature range of paints is certified by the "econature" label, an internal quality label that Mathys® adheres to in order to supply paint products with very low VOC levels for professional and private end users.*
*By assigning this label, you can be certain that these products are not harmful to us or to the environment.*
*In short:* ***approved by nature.***

# A proper start is halfway to winning!

You get the nicest finish through proper pre-treatment of the substrate.
It is important for damaged, irregular substrates to be cleaned and repaired, or for highly porous walls and ceilings to be coated with the appropriate primers.
Only then should the finishing coat be applied.

**STEP 1 : Preparation**
**STEP 2 : Choosing the right product**

## STEP 1

## Preparation

The preparation depends on the type and condition of the substrate. A thorough analysis is thus important for correct treatment of the walls and ceilings.

### UNTREATED WALLS AND CEILINGS

- Free the plasterwork of dust (by dusting or brushing).
  We advise against using water because water causes powdering of the substrate. If powdering or nitrates are still present, the surface needs to be fixed with a fixative.
- Get rid of crevices and imperfections by using a filler, and seal small cracks and joints.
- Isolate nicotine or water stains to prevent the spots bleeding through into the final finish.

### PAINTED WALLS AND CEILINGS

- Paint straight over old, porous paint layers in good condition. Soiled non-porous substrates are best washed gently; the wall must then be left sufficiently long to dry out.
- Lightly sand off old paint layers in poor condition, dust them off and then use a primer.
- After cleaning and repair, we recommend using a primer. This makes for a better result.

### PLASTERBOARD

- Always fill the joints between plasterboards and, after drying, roughen up the filler here and there and then apply a primer coat.

### BRICK INTERIOR WALLS

- Remove any nitrates and then apply a primer coat.

### CEMENT WORK AND CONCRETE

- Remove any nitrates and apply a primer coat.

### BATHROOMS & KITCHENS

- Always use a paint system that is suitable for damp walls, as well as one that is very easy to wash off.

### PERMANENTLY DAMP WALLS

- There may be many underlying causes of this:
  - Rising damp
  - Leaks
  - Rainwater penetration
- For such walls, in the first instance, it is very important to tackle the cause and to fix this. Only then can finishing the walls begin.

### OLD WALLPAPER

- We advise against painting over old wallpaper because of possible bubble formation, and moreover, removal of the paper (after it has been painted) is also much more difficult.

### PAINTING FIBREGLASS WALLPAPER

- It covers cracks (and also reduces the formation of new cracks), strengthens the wall and gets rid of imperfections. For various rooms, fibreglass wallpaper can be a decorative and ideal solution. Paintable with most finishing products.

## STEP 2

## Choosing the right product

Durable protection and decoration of your interior project, that's what we aim for. With our product guide, you can fine-tune your choice depending on the substrate and the desired aesthetic result.

**ASPECT** + **COLOUR** = **reflection of your personality**

PRIMERS

**Mathys® has a wide range of excellent primers and repair products, for preparing substrates with the necessary care.**

## Fixonal

10m²/l

- Fixator
- Fixes and reinforces the substrate
- Quick-drying
- Flexible

## Paracem® Deco Primer

8-10m²/l ColourShop

- Strengthens the substrate and reduces porosity
- Neutralises differences in absorption
- Covers really well
- Prevents different degrees of gloss in the final coat
- Primer to be used in combination with products from the Paracem® Deco range

## Pegafix Universal

5-15m²/l

- Colourless impregnating primer
- Strong fixing power
- Suitable for various slightly chalky and porous substrates

## Porisol

3-10m²/l

- Pore filler
- Fixator
- Nearly odourless

## Paracem® Deco Nature Primer

8-10m²/l ColourShop

- Ecolabel®
- Water-based impregnating primer
- Strong fixing power
- Suitable for most substrates
- Use this primer in conjunction with a product from the Paracem® Deco Nature collection
- Loi Grenelle (Sustainable Energy) Class A

ADHESION & ISOLATION PRIMERS

## Pegaprim Xpress

10m²/l

- Isolating and quick-drying universal bonding primer
- Good filling and opacity
- Tightly adhering paint film
- Flexible

## Pegaprim Isofix

10m²/l

- Ultra-isolating and quick-drying universal bonding primer
- Masks odours
- Very fast drying
- Tightly adhering paint film

REPAIR PRODUCTS

## Pegacrete

32kg/m²

- Repair product for interior and exterior work
- Filling cracks, holes and other damage in concrete, cement
- Rapid curing
- Good mechanical strength
- 100 % shrink-proof
- Easy to apply

## Elastofill

- Multi-use: sealing - filling - fixing - gluing - stopping up
- Universally paintable
- Permanently elastic
- Interior and exterior use
- + 30 years' experience

## Plastopan Latex

1-3kg/m²

- Extra white latex filler
- Elastic and flexible
- Easy to spread
- Easily sanded

## ElastoPro

- Acrylic sealant of professional quality
- Sealing of connecting joints and cracks
- Quick and paintable
- Interior use
- Excellent adhesion

## Pegaflex

1.8Kg/m²

- Universal levelling filler
- High flexibility
- Excellent adhesion
- Sanded easily

# Paracem® Deco

**The Paracem® Deco range is a complete selection of high-quality acrylic paints for all your interior walls and ceilings. Available in various degrees of gloss and in all colours: matte (Paracem® Deco Matt), satin gloss (Paracem® Deco Satin) and satin matte (Paracem® Deco Semi-Matt). The range is completed with ceiling paint (Paracem® Deco Plafond) and a washable matte renovation paint (Paracem® Deco Premium Mat).**

## FEATURES

- High-quality decorative finish for interior walls and ceilings
- Suitable for most substrates: plaster, brick, concrete, fibreglass...
- For use in both private and public buildings
- Excellent flow
- Good opacity
- No tendency to overlapping
- Good mechanical resistance to rubbing
- Spatter-free
- Tight film structure (Semi-Matt and Satin)
- Washable (Semi-Matt and Satin)
- Available in virtually any colour

## Paracem® Deco Plafond

6-8m²/L ColourShop 2

**Super opaque extra matte acrylic paint. Because of the long open time, lapping and overlapping can be easily avoided, this makes Paracem® Deco Plafond ideal for ceilings.**

- Conceals imperfections through its matte appearance
- Covers with a single coat
- Can stay open a long time
- No tendency to lapping
- Suitable for most substrates
- Available in pastel colours

## Paracem® Deco Premium Mat

6-8m²/L ColourShop 2

**Isolating renovation paint with good coverage for interior walls and ceilings. Paracem® Deco Premium Matt is a monoproduct = primer and topcoat in 1 product.**

- Isolates spots (soot, nicotine, water rings ...)
- Completely matte appearance
- Good flow without lapping
- Water vapour permeable
- Can be lightly cleaned
- Available in pastel colours

## The best paint for you and for nature

EU Ecolabel www.ecolabel.eu
EU Ecolabel : BE/07/002

The Paracem® Deco Nature range of paints is the best alternative for anyone who is concerned with their own well-being and that of others. These interior wall and ceiling paints are registered with the prestigious European Ecolabel® mark. The Ecolabel® is awarded to products and services that have a lower environmental impact, for example with reduced waste and lower emissions for the air, water and soil.

Furthermore, with their new formula Paracem® Deco Nature paints are just as good as conventional interior wall and ceiling paints in terms of ease of use and performance, so the same level of productivity is maintained.

Europe is increasingly requiring countries to use Ecolabel® certified paints for applications in public spaces such as hospitals, municipal public buildings, rest homes, day-care centres, etc.

**Paint registered with the Ecolabel must meet a number of strict requirements:**

- It must be of top quality
- The paints must meet certain technical specifications such as coverage, wet scrub resistance
- They must be entirely free of heavy metals and other harmful substances
- There are limit values for air pollution, reduced sulphur emissions and the amount of waste generated in the production of these paints

# Cachemire®

**Discover the intense beauty of our cashmere-feel Cachemire® colour range. Feel the texture of our designer paints. Cachemire® paints are of the highest quality and, through their designer aspect, bestow an unparalleled richness on all 120 Cachemire® colours.**
**Cachemire® Cashmere is available in 120 colours and six different appearances.**

## Cachemire® Mat Intense

ColourShop® 2
ADVANCED COLOUR SERVICE BY RUST-OLEUM MATHYS

**IMAGINE ™**

More than 1,200 contemporary and traditional colours for interior and exterior use.
A colour collection based on and inspired by real life, where colour is really used and doesn't emerge from the pallet of a designer or a colour computer. In addition, 180 RAL colours have been added to these. Imagine™ is a colour collection that inspires and influences...

**COLORIST**

297 colours, 33 colour groups. Colorist groups approximately 33 natural basic colours, each with three secondary and five detail colours.

- The basic colours are the colours of natural materials.
- The three secondary colours belong to the same tonal family as the basic colour but vary in brightness or depth. Alternatively, they are complementary to the basic colour.
- The five detail colours are intense and lively colours that either accentuate the basic and secondary colours or else contrast with them.

You can combine all the colours in a group with each other. Using each of the 33 colour groups you can create up to 501 colour combinations.

**CACHEMIRE®**

The Cachemire® range has been carefully put together by experienced colour specialists. Constantly in search of new nuances, they designed a palette of 120 colours that give you an idea of what Cachemire® could mean. Colours that give your room an almost palpable aura. The Cachemire® colour chart allows you space for brilliant combinations. By combining colours, they come to life even more, create even more atmosphere.
Will you opt for colours from the same colour group or will you go for a more daring combination using one or more contrasting colours?
Whatever you choose, the result is always stunning.
