## Paracem® Universal

UNIVERSAL PAINT FOR EXTERIOR WORKS

CREATE A SLEEK LOOK

M0135GB - 02.19

## CREATE A UNIFORM LOOK

Whether it's bricks, windows, gutters, drains, or practically anything else, Paracem® Universal will adhere to it and will ensure that the exterior walls have a beautifully uniform look.

This paint is also particularly colourfast and weather-resistant, which means that the exterior walls will look optimal for years to come.

It also contains a specific additive that protects the dry paint film from moulds. An added benefit for long-term protection.

## SELF-PRIMING AND NO SANDING

You will not need a separate primer for most substrates. Paracem® Universal adheres without sanding.

The first layer primes and seals the surface. The second layer completes the sealing process and provides additional moisture resistance and protection.

The paint is water vapour-permeable, which allows the wall to breathe.

## EASY TO APPLY AND FAST-DRYING

Paracem® Universal is particularly easy to apply and dries quickly. In many cases, depending on the weather conditions, you can start to apply the second layer after an hour. This saves you a lot of time and lets you start the next job more quickly.

The high efficiency (up to 12 m<sup>2</sup>/litre/layer) is also an additional asset.

## AVAILABLE IN ANY COLOUR

You can get Paracem® Universal in practically any colour, from bright, fresh colours to dark, warm shades, thanks to the ColourShop® 2 tint system.

A unique feature is that the colours do not darken when the walls get wet.
