AMW FUNGICIDAL WASH

DESCRIPTION
Ready-mix fungi and algae remover for walls and roofs.

RECOMMENDED USE
As a masonry surface fungicidal wash for professional use against mould, fungi, moss, etc. Also suitable for treatment of similarly affected roof surfaces.

THEORETICAL CONSUMPTION
5 m²/l

PRACTICAL CONSUMPTION
Practical coverage depends on many factors such as porosity and roughness of the substrate and material losses during application.

SURFACE PREPARATION
All mould, fungi, lichens etc. should be given a saturated coat of AMW before their complete removal (to kill spores). Remove debris by power washing or use of a stiff brush. The whole area should then be given a second coat of AMW and allowed to dry (to render the substrate sterile).

DIRECTIONS FOR USE
Apply AMW abundantly, preferably by brush, and wait 12 hours. Dry-brush and remove dust prior to painting, or clean with high-pressure water and let the surface dry. Affected by heavy rainfall for at least 4 hours after application. If doubtful re-apply. Ensure residues are substantially diluted with water before entering drains etc.

APPLICATION CONDITIONS
Minimum 8°C and maximum 80% R.H.

APPLICATION & THINNING: BRUSH
Do not dilute.

APPLICATION & THINNING: AIR-ATOMISED SPRAY
"Coarse" spray such as a pneumatic garden spray. Do not dilute.

CLEANING OF EQUIPMENT / SPILLS
Water.

REMARKS
This fungicidal product is only available in the UK, so not available for Export. HSE-approval no. 9225

SAFETY DATA
VOC level: 0 g/l
Remarks regarding safety: Consult Safety Data Sheet and Safety Information printed on the can.
Use biocides safely. Always read the label and product information before use.

PH
4,50

SHELF LIFE
Minimum of 3 years from date of production in unopened cans, if stored in dry, well ventilated areas, not in direct sunlight at temperatures between 5° and 35°C. **Protect material from frost.**

Date issued: 07/02/2025
